SUMMARY

Software Engineering graduate with a dedicated focus on "Technology for Good." Founder and Lead Developer of Project Athar, a TÜBİTAK-backed AI platform for crisis response and volunteer mobilization. Experienced in international operations and community leadership through roles with the Islamic Cooperation Youth Forum (ICYF) and Alsharq Forum. Committed to leveraging robust software architecture and data structures to solve complex global challenges.

WORK EXPERIENCE

Intern – Young Business Hub Department

Mar 2026 – Present

Islamic Cooperation Youth Fourm (ICYF), Istanbul, Turkey

- Draft, review, and refine professional cross-cultural communications, ensuring linguistic accuracy and appropriate tone for diverse international regions.
- Operate within a high-standards bilingual environment, requiring strict attention to detail in organizational documentation and business correspondence.

Software Engineering Intern

Jan 2026 – Feb 2026

EVA Team Altınbaş University, Istanbul, Turkey

- Completed a 20-day intensive technical internship focused on autonomous robotic systems.
- Designed and developed software architecture utilizing ROS 2 and Gazebo for complex simulation phases.
- Authored comprehensive technical documentation outlining system architecture and simulation workflows.

Front-End Developer

June 2020 – Aug 2020

Nilogy Company , Khartoum, Sudan

- .Worked as a trainee in web development and design department , Developed and maintained websites using HTML, CSS, and JavaScript.
- Collaborated with clients to ensure their needs were met and exceeded.
- Managed multiple projects simultaneously, meeting deadlines.

LANGUAGES

Arabic: Native

English: Fluent

Turkish: Beginner

PROJECT SPOTLIGHT: TECHNOLOGY FOR IMPACT

Founder & Lead Developer | Project Athar (Crisis Response Platform backed by TÜBİTAK)
React, TypeScript, Firebase, Tailwind CSS, Llama-3 API

- Architected and developed a real-time crisis mobilization and volunteer dispatch ecosystem, securing TÜBİTAK 2209-A research funding.
- Engineered an adaptive dispatch algorithm and 4-tier verification pipeline to surgically deploy skilled volunteers using live NoSQL geospatial queries.
- Integrated a context-aware AI assistant and optimized front-end rendering with WebSockets (onSnapshot) for zero-latency mission telemetry.

GLOBAL LEADERSHIP & VOLUNTEER EXPERIENCE

Liaison Officer (Protocol Team): Alsharq 9th Conference, Istanbul

- Managed rapid communication and logistics for high-level delegates in a high-pressure environment.

International Delegate: 7th ICYF International Volunteer Camp, Antalya

- Collaborated with tech and youth leaders from 50+ countries to design community resilience frameworks.

Volunteer finance assistant: Takaful Charitable Organization

- Developed strong organizational and time-management skills while managing (A Day with an Orphan) project and deadline.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, TypeScript, Kotlin, Java, C, C++, SQL
- Web Frameworks & Libraries: React, Tailwind CSS, Bootstrap
- Databases & Cloud Services: PostgreSQL, MongoDB, Firebase (Firestore)
- Tools & Environments: VS Code, Visual Studio, Android Studio, Git/GitHub, Ubuntu
- Software & Architecture: API Integration, Full-Stack Development, Mission-Critical Systems Design, Technical Documentation

EDUCATION

Bachelor of Science in Software Engineering Altınbaş University, Istanbul, Turkey	2022 - 2026
Bachelor of Science in Information Technology University of Khartoum, Khartoum, Sudan	2016 - (Incomplete)

COURSES & CERTIFICATES

- Python Data Structures – University of Michigan
- Python Training Certificate – Frontier Tech Leaders (FTL) Sudan
- Teacher Training Certificate (TTC) – WAVES Training Center
- Selected Participant – ICYF Youth Volunteer Programs
